

Exploring Cars

A hand-drawn sketch of a mobile application interface titled "Filters". The interface is designed for filtering car options. At the top left is a back arrow icon. Below the title is a location input field with a pin icon and the text "Your location". Underneath are two buttons: "Pick up" and "Return". A checkbox labeled "Flexible times" is positioned below these buttons. A horizontal line separates the top section from the "Type" section. In the "Type" section, there are two checked checkboxes: "Automatic" and "Manual". Below this, there are two columns of unchecked checkboxes, each followed by a horizontal line, representing additional filter options. The next section contains two input fields: "seats" (with a person icon) and "Doors" (with a car icon). The final section is labeled "Features" and contains two more unchecked checkboxes, each followed by a horizontal line.

Comparing Cars

- Narrowed down to a handful, clicking/tapping in to learn more, such as:
 - Features not displayed on the card
 - Availability beyond the selected times
 - An estimated total using destination
 - The ideal park and directions to it
